

Week 13: Psalm 24

#addewidagobaith #hopeandpromise

He's got the whole world, in His hand,
He's got the whole wide world, in His
hand, He's got the whole world, in His
hand, He's got the whole world, in His
hand.

He's got the wind and the rain, in His
hand, He's got the wind and the rain,
in His hand, He's got the wind and the
rain, in His hand, He's got the whole
world in His hand.

Chorus

He's got the sun and the moon, in His
hand, He's got the sun and the moon,
in His hand, He's got the sun and the
moon, in His hand, He's got the whole
world in His hand.

Chorus

He's got the plants and the creatures,
in His hand, He's got the plants and
the creatures, in His hand, He's got
the plants and the creatures, in His
hand, He's got the whole world in His
hand.

Chorus

He's got everybody here, in His hand,
He's got everybody here, in His hand,
He's got everybody here, in His hand,
He's got the whole world in His hand.

Chorus

BBC teach, school radio, songs for
collectible worship and assemblies

The world and all that is in it belong to the Lord;
the earth and all who live on it are his.
He built it on the deep waters beneath the earth
and laid its foundations in the ocean depths.

Psalm 24 invites us to think about God's Earth and how
precious it is. It is a psalm of praise and rejoicing.

When we are not rushing around we have time to
notice things around us e.g. the trees swaying in a
breeze or a tiny bird flying outside our window.

Write a Poem

Make a 'noticing' poem – on your walk or from your window. Start to
really look and notice things. Take a photograph or draw a picture and
write some describing word. Then you could write it into a poem.

Create a poem like this:

From the tall, beautiful foxglove to the curved wooden bench
From the curved wooden bench to the busy bumble bee
From the busy bumble bee to the old garden gate

Cloud Gaze

Our Earth is amazing. On a warm summer's
day, find a patch of grass, lie back and watch the clouds go by.
Remember...

If the sky is bright, Do not to look directly at the sun: it can damage
your eyes.

Research

Amazing Earth facts - Clouds are made up of lots of tiny water droplets or ice particles floating in the sky at different heights.

Some look white because they reflect light from the sun. Others appear grey because they are full of water. They all float at different heights and while they appear to be moving slowly, some travel as fast as 100mph.

Can you find out any more amazing facts about our Earth? Use the Britannica Digital Learning tool on Hwb to help you with your research.

Take a Sound Walk

During lockdown there has been less traffic and less noise around us. Take a walk or open a window and listen carefully to the sounds you can hear. Make a list of the wonderful sounds and what they might be. Which ones are natural sounds?

Landscapes

You may visit some beautiful local places during lockdown where you can pause and think about what you can see and hear. You may like to look at an image or a painting of a landscape and think about how this makes you feel. Maybe you could recreate some of the landscapes using paint.
